

IHSAN ULLAH

IT & Network Infrastructure Engineer

Abu Dhabi, UAE | +971 567 292 469 | ihsanad875@gmail.com | [linkedin.com/in/ihsan875](https://www.linkedin.com/in/ihsan875)

Nationality: Pakistani | Employment Visa | Valid Driving License

PROFESSIONAL SUMMARY

Results-driven IT & Network Infrastructure Engineer with 6+ years of hands-on experience managing enterprise IT environments across multi-site operations in the UAE and Pakistan. Proven track record in deploying and maintaining servers, firewalls, switching/routing infrastructure, VPNs, Microsoft 365, Azure AD, NAS storage, ERP systems (BuildSmart), and CCTV. Recently led the design and implementation of AI/LLM-based workflow automation solutions. Adept at reducing downtime, strengthening security posture, and aligning IT operations with business objectives. Holds CCNA, MCSE, and Fortinet NSE certifications.

WORK EXPERIENCE

IT Engineer

Oct 2025 – Present

Ultraction General Contracting LLC | Abu Dhabi, UAE

General contracting firm with multi-site operations across Abu Dhabi; IT environment supporting 80+ users across offices and project sites.

- Managed end-to-end IT infrastructure across 3+ sites including servers, Cisco/HP switches, Fortinet firewalls, APs, VoIP, CCTV, and end-user devices — maintaining 99%+ system uptime.
- Administered Microsoft 365, Azure AD, and Exchange Online for 80+ users, including user lifecycle management, MFA rollout, and conditional access policy enforcement.
- Designed and deployed NAS-based backup architecture with local and cloud replication, reducing data recovery time by 35% and achieving near-100% backup success rate.
- Led AI/LLM solution design and implementation to automate internal workflows, reducing manual processing time for key business operations by an estimated 30%.
- Supported and maintained BuildSmart ERP system, coordinating with the vendor on upgrades, user training, and issue resolution — minimising ERP-related downtime.
- Managed IT procurement and vendor relationships with ISPs, hardware suppliers, and software vendors, negotiating contracts and ensuring SLA compliance.
- Implemented structured IT asset management process for onboarding, transfers, and offboarding — including secure data wiping and compliance documentation.
- Provided escalated L2/L3 support for advanced network, server, and infrastructure issues across all business locations.

IT Support Engineer

Dec 2023 – Sep 2025

Segments Cloud Computing LLC | Abu Dhabi, UAE

Large-scale data center operations and managed IT services provider; managed network and infrastructure across 40+ high-density facilities in Abu Dhabi.

- Configured and maintained switches, routers, and firewalls for multiple client sites, proactively resolving L2/L3 connectivity issues and reducing client-reported incidents by 25%.
- Planned and deployed CCTV systems with VPN integration for centralized remote monitoring across client locations, ensuring secure network segmentation.
- Coordinated with ISPs for circuit provisioning, fault escalation, and service restoration — consistently meeting SLA targets for client uptime.
- Conducted preventive maintenance, network inspections, and compliance checks across sites; maintained up-to-date topology diagrams and configuration documentation.
- Delivered end-user training sessions on network tools and IT systems, empowering users to resolve common issues independently and reducing repeat helpdesk tickets.

- Diagnosed and resolved hardware and software issues across diverse client environments including PCs, servers, printers, and peripheral devices.

IT Support Specialist

Jan 2020 – Oct 2023

Websterz | Sialkot, Pakistan

IT services company providing hardware repair, software support, and IT consultancy to SME clients in Sialkot.

- Provided L1/L2 technical support (in-person and remote) for hardware, software, OS, and network issues across a diverse SME client base.
- Performed hardware upgrades, OS installations, virus/malware removal, and system reconfigurations — maintaining high client satisfaction scores.
- Managed and tracked IT hardware inventory across client accounts, ensuring assets remained functional, compliant, and up to date.
- Delivered user training on software applications, cybersecurity best practices, and common troubleshooting techniques.
- Maintained detailed records of all resolved issues, hardware changes, and software updates for audit and future reference.
